

SafeXing™

Advanced Warning Crosswalk System by Fortel Traffic, Inc

Fortel Traffic's self-contained solar-powered SafeXing™ system provides more advanced warning to drivers when there are pedestrians in an upcoming crosswalk. The LED sign may be placed up to 800 feet away from a crosswalk, making it the ideal choice for pedestrian crossings around corners, over hills, or any other possible application. The sign also doubles as a traffic calming sign with an optional radar.

SIGN TRIGGERING/ACTUATION:

1. When PED push button is actuated, display alerts drivers of pedestrians in crosswalk.
2. Internal Radar detects vehicle speeds causing drivers to slow down when exceeding the speed limit.

BRIGHTEST DISPLAY:

SafeXing™ utilizes high-volume high-intensity tightly clustered LEDs to maintain the highest visibility possible. This proven method of authoritative message presentation demands driver's attention, making it the most efficient traffic calming sign on the market.

LOWEST POWER CONSUMPTION:

SafeXing™ uses proprietary PWMS™ LED technology that consumes 50% less power than common LED technology. Solar power with back-up battery power is included to deliver exceptional autonomy.

STRONGEST CONSTRUCTION:

SafeXing™ is lightweight and easy to install, yet maintains superior construction and durability. VCalm® has consistently proven to be the longest lasting speed sign in the industry.

SIMPLEST PROGRAMMING:

- SD Card provides practically limitless data storage space (40 years of data per gigabyte) and makes programming and data retrieval simple and affordable. (SDHC compatible)
- Modems, coupled with our automated online software, provide remote access to sign programming so changes can be made instantly.
- VSpeed™Online is the ultimate management software that gives the ability to program signs, simulate functionality, analyze data, and deploy configuration changes through remote access or SD cards.

VCalm® Optional Equipment by Fortel Traffic, Inc

The VCalm®'s optional equipment not only makes it the most versatile sign on the market, but also the most useful and effective. The following are popular options available for VCalm®.

WIRELESS IP MODEM

Automate data downloads and configuration changes wirelessly and eliminate the need to visit the sign physically using VSpeed™Online

- Connection speeds up to 2.4mbps

STROBES, FLASHERS AND SIRENS

Force speed reduction by simulating law enforcement flashers, sirens, or photo radar.

GROUND-LEVEL ACCESS

Adding a Drop-down Box allows for easy access to sign programming without the use of ladders, buckets, or platform trucks.

- 10 ft. of armored, weatherproof flex conduit
- Corrosion-proof, weather-tight Pelican lock box
- SD Card technology for quick and easy data transfer

GPS

Automatically adjusts date and time settings using GPS tracking of sign position. Also allows coordinates to be accessed using IP modem

AUTOMATIC DIMMING

Optimizes the VCalm®'s display visibility by adjusting LED brightness according to ambient light conditions with the photo diode upgrade. Ambient light conditions are also logged to allow accurate diagnosis of solar outages.

WIRELESS ALERT SYSTEM

A wireless alert system is ideal for improving the safety of various situations and has up to a 2-mile range (depending on antennae used).

- Alert construction workers of unsafe drivers entering the construction zone.
- Give advanced warning to vehicles when pedestrians are crossing a nearby crosswalk
- Warn children of unsafe drivers in school zones

WIRELESS WIFI

Connect wirelessly to the sign using a laptop's wifi connection from up to 30 feet away.

- DHCP network data connection
- WPA security ready

FOR TEL

VSpeed™ Online

Ultimate Sign Management Software by Fortel Traffic, Inc

Revolutionary sign management tool that allows the ability to program signs, simulate functionality, analyze data, and remotely deploy configuration changes with an easy to use interface.

FEATURES:

- **CENTRALIZED WEB PROGRAMMING:** Stay up-to-date with the latest configurations for each sign.
- **EASY SIGN MANAGEMENT:** Access all sign data and programming from a map of all your signs.
- **SIMPLIFIED PROGRAMMING:** Program your signs using an intuitive “drag and drop” style programming method that will help avoid programming mistakes.
- **SIMPLE DATA MANAGEMENT:** Keep all sign speed data in a single database allowing reports to be retrieved on demand within user-specified date ranges.
- **GRAPHS AND CALCULATIONS:** Percentile graphs and time of day graphs to allow fast discovery of times when law enforcement measures are necessary.
- **AUTOMATED DATA SUMMARIES:** 10mph incremental analysis lets you know what percentage of vehicles are slowing down at each 10mph increment.
- **CONFIGURATION SIMULATOR:** Simulate a program and demonstrate functionality to others before deployment.
- **AUTO DOWNLOADING:** The software will automatically connect and download data from all signs equipped with an IP modem so that your data and sign programming is always up-to-date.

- **INTUITIVE WARNINGS:** Maintains a running log of power failures, sign functions, and other important events to enable up-to-date reports of sign health and solar status.
- **INSTANT CRITICAL MESSAGING:** Instantly send critical messages to the sign to display warnings, emergencies, and other important information. (requires IP modem)
